

Serial No.: 10/519,717
Atty. Docket No.: P70334US0

IN THE ABSTRACT:

Please amend the abstract as follows:

--~~The invention concerns a~~ A timepiece, in particular a wristwatch ~~comprising~~ having a middle ~~(1)~~, a watch movement ~~(4)~~ housed in the middle, a transmission and/or reception circuit ~~(5)~~ associated with ~~said the~~ the movement and an antenna ~~(9)~~ connected to ~~said the~~ the transmission and/or reception circuit. The ~~invention is characterized in that the~~ antenna ~~(9) consists in~~ includes an electrically conductive solid single-piece mass ~~(10)~~ shaped at least partly like a ring, ~~said the~~ the mass being arranged at the periphery of ~~said the~~ the middle ~~(1)~~. Furthermore, the antenna is connected to the transmission and/or reception circuit via a conductor ~~(10)~~ passing through the wall of the middle ~~(1)~~ over part of its thickness.--
